

Combat System Video Network (CSVN)

CSVN provides fast and reliable radar and TV video delivery within the Combat System using COTS equipment.

Typical CSVN has the following capabilities;

- Distribution of radar and TV video signals to Combat Management System Operator/Tactical Consoles
- Continuous recording of tactical displays of consoles
- Replay of recorded data on any desired console and remote displays
- User friendly GUI to manage recording and replay

Typical CSVN Achitecture

“In service onboard Turkish Navy G-Class Frigates”
